Commercial JumpStart Programs

SPSS offers 5 and 7-day JumpStart programs for the commercial market.
The 5 day program addresses installation, education, and survey development.

DWS1: Survey Creation with Web Deployment Service in Single Server Environment (5 days)

Survey Review and Project Planning (.5 Day)

- Planning sessions cover practical needs and result in a plan document based on the SOW
- Participants identify the target output, review the survey, and commit to development and delivery
 - The survey must be basic in nature. As such features should be limited to:
 - Basic or simple routing patterns
 - Standard look and feel of text formatting throughout the survey
 - Minimal logic checks and scoring
- Single and multiple server environmental requirements for running the survey after delivery are presented to the customer with project delivery timeline

Installation (1 Day)

- Consultant will perform an install of mrInterview™ Professional and mrTables™ using default settings whenever possible
- A multiple server environment as defined in the appendices
- Environment must meet the pre-requisites outlined in the installation manual
- Access to system and proper personnel required
- Installation may be performed remotely by SPSS staff

Education (2.5 Days)

- Dimensions™ Survey Creation
- Dimensions Administration: Web
- Dimensions Report Creation or Survey Analysis

Coaching and Mentoring (1 Day)

Coaching and mentoring by SPSS consultant on creating, testing and validating the survey

Standard Investment

The typical investment in this 5 Day program is \$12,500.00 plus expenses

Discounted Offering

SPSS offers this service at **\$9,999.00 plus expenses**
